

GEBCO Bathymetric Science Day 2009

# Olex global sounding database:

*a phenomenal resource for regional bathymetric mapping projects*

Colin Jacobs, Pauline Weatherall, Martin Jakobsson

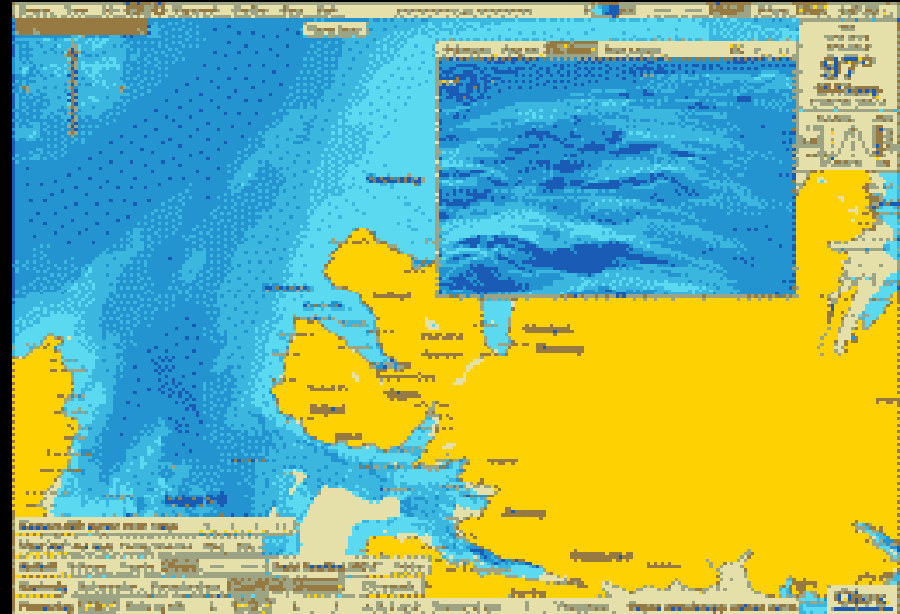

Examples from the IBCAO region

## Background

- 1. Olex is mapping and visualization software widely used within the fishing industry**
- 2. The concept builds on that the sounding data collected by fishing vessels from all oceans of the world are sent back to Olex to continuously update their database, which then is redistributed to the users**
- 3. Olex processes and quality controls all data before it incorporated into their mapping and visualization software**

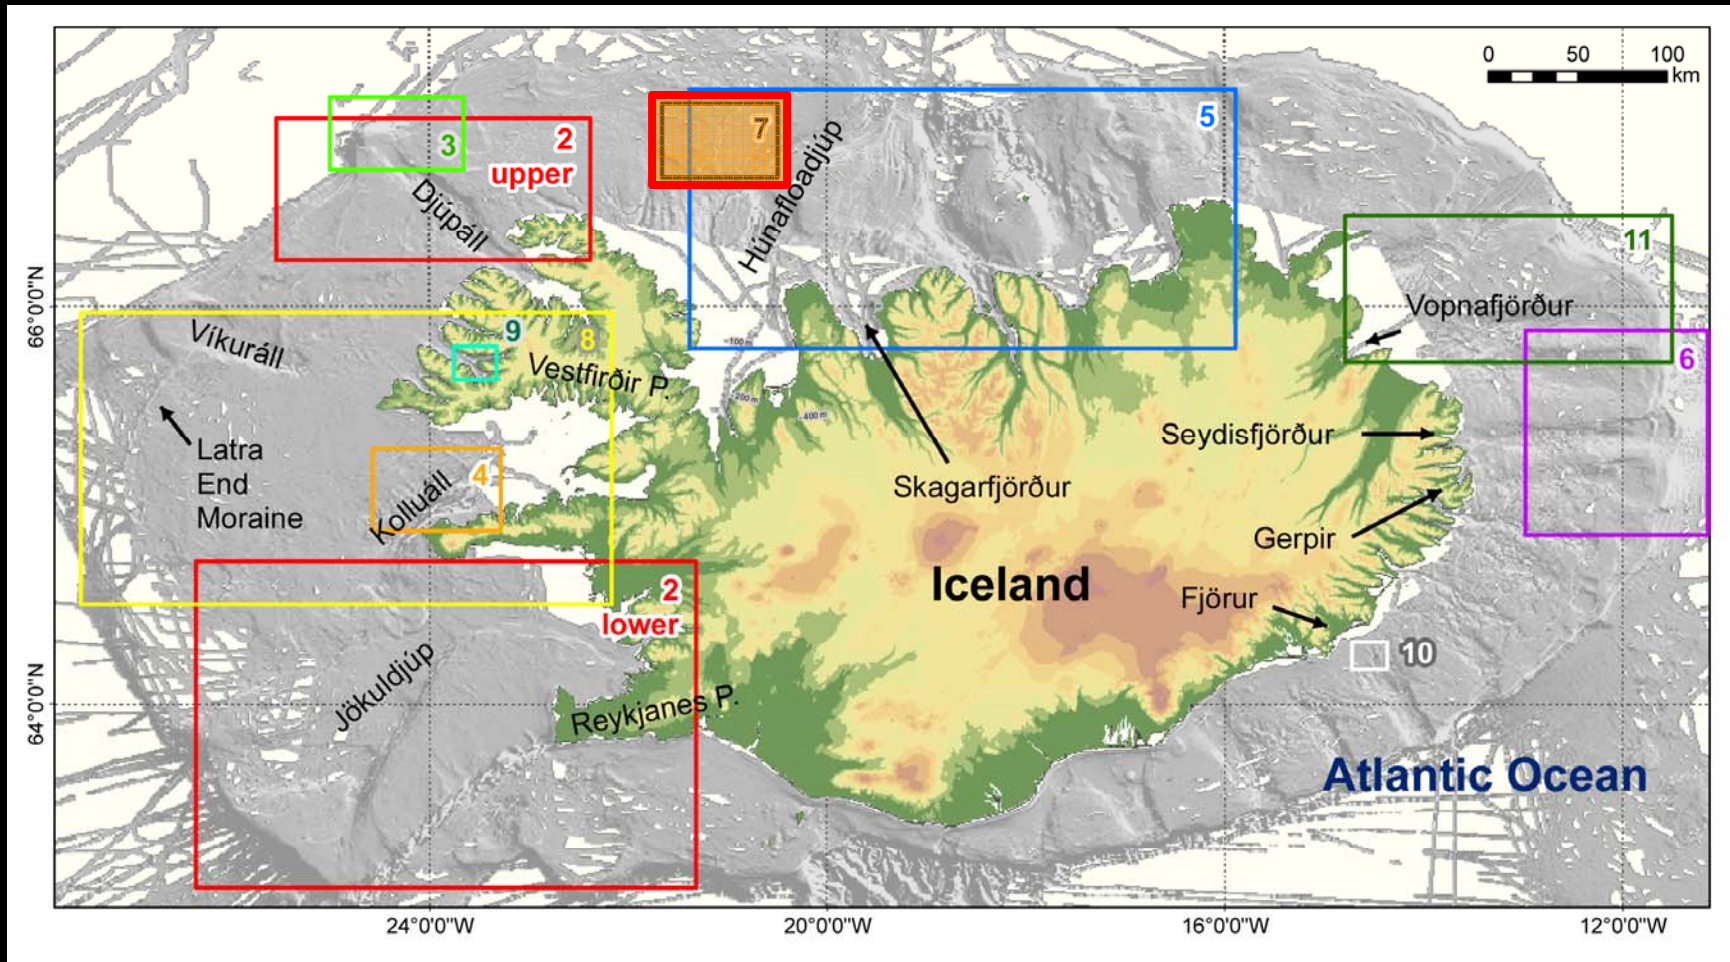

**Olex data has been used in several sea floor morphological studies**

**One example from Journal of Maps 2009:**

**A geomorphological overview of glacial landforms on the Icelandic continental shelf**

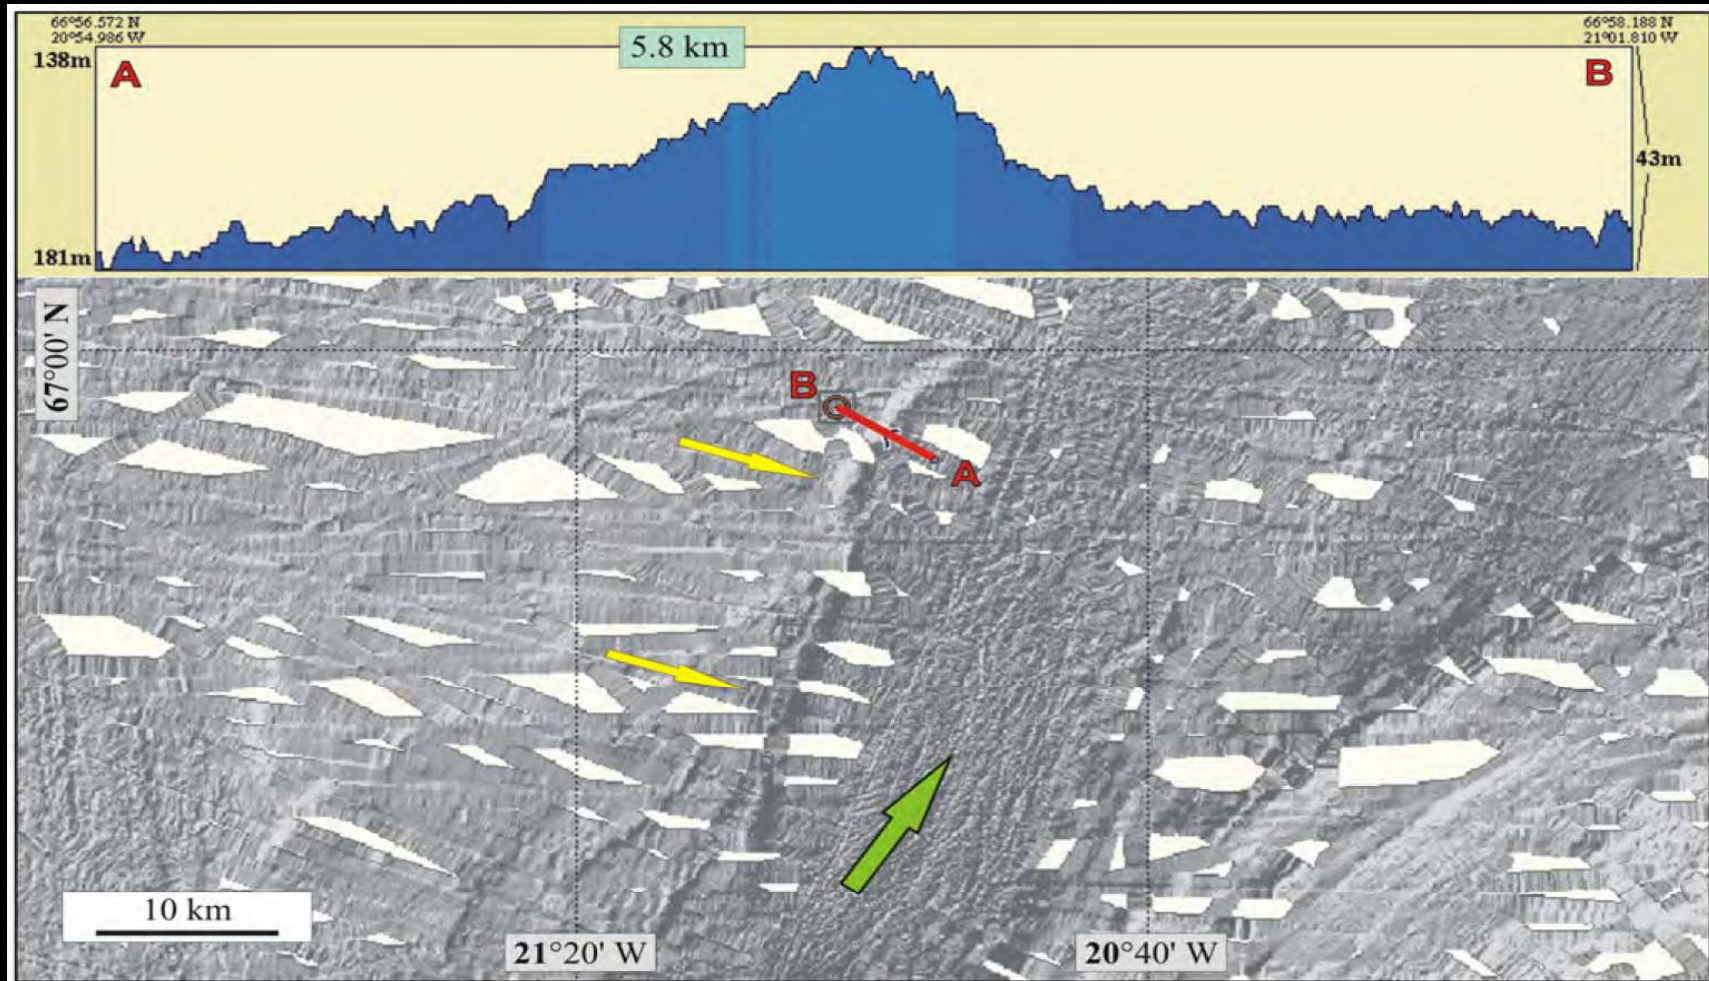

**MATTEO SPAGNOLO and CHRIS D. CLARK**

The Olex database covers about 80% of the Icelandic shelf. Spagnolo and Clark made use of this data to produce a geomorphological map of the glacial landforms.

From Spagnolo and Clark, 2009

**A lateral moraine complex (yellow arrows) is visible. The iceflow direction inferred by the authors based on the Olex data is marked by a green arrow.**

**From Spagnolo and Clark, 2009**

## **What can we do with the Olex data on a broader scale?**

**We received a global snapshot of the Olex database at a resolution of 400x400 m grid cells.**

**This Olex gridded data is here compared with the International Bathymetric Chart of the Arctic Ocean (IBCAO)**

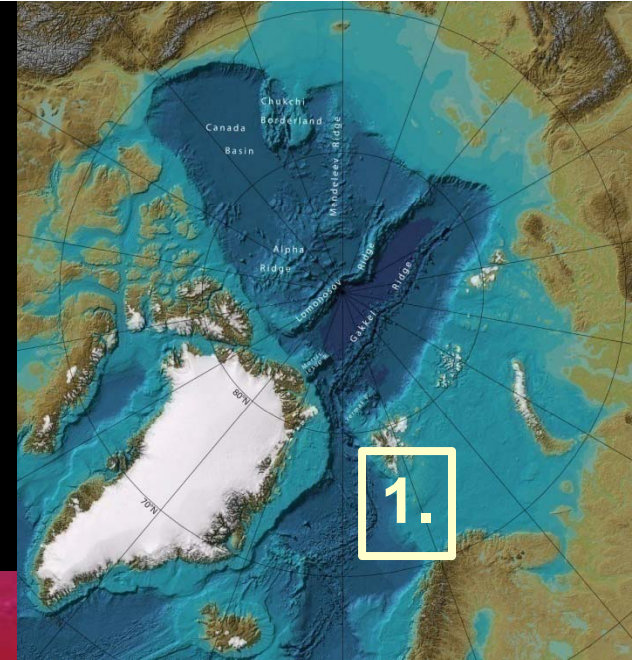

# GEOBCO Bathymetric Science Day 2009

# Bear Island Trough

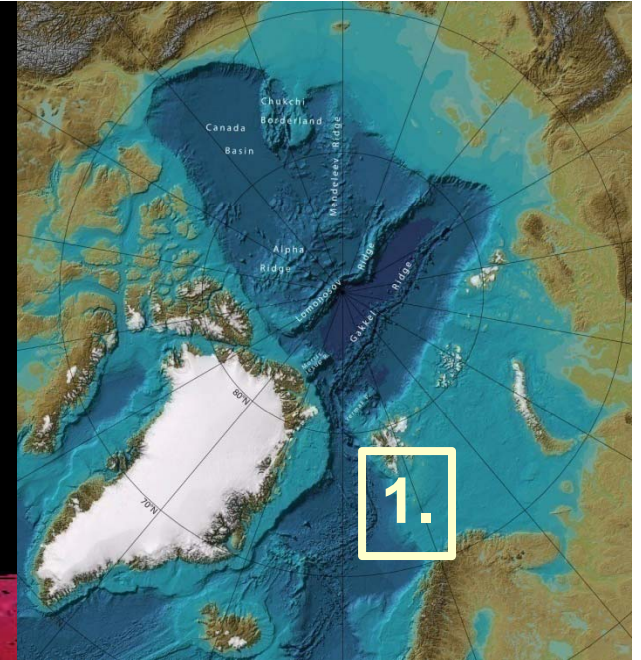

IBCAO Ver 2.25 1 km grid cells

# Bear Island Trough

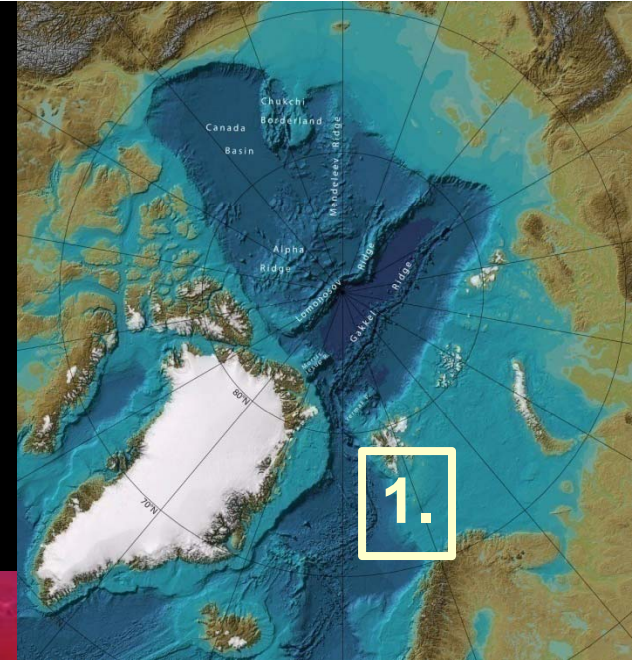

Olex 400 m grid cells

**Not only to throw in the data and grid!**

**Bear Island Trough**

**Artefacts from contours**

**IBCAO updated with Olex, 1 km grid cells**

GEBCO Bathymetric Science Day 2009

# Norwegian Continental Shelf

IBCAO Ver 2.25 1 km grid cells

# Norwegian Continental Shelf

Olex 400 m grid cells

## Norwegian Continental Shelf

↗ Mega scale glacial lineations

Olex 400 m grid cells

# Iceland (view from North)

# Iceland (view from North)

Olex 400 m grid cells

**GEBCO Bathymetric Science Day 2009**

**More Iceland with Fledermaus!**

## Questions

**What are the depths in the Olex database referred to, MSL, MLLW, MLW ??**

**Is there any information available on sound velocity correction?**

GEBCO Bathymetric Science Day 2009

# Comparing Olex with Oden EM122 data off Svalbard

Olex 400 m grid cells

GEBCO Bathymetric Science Day 2009

## Comparing Olex with Oden EM122 data off Svalbard

Olex 400 m grid cells versus Oden 20 m grid cells

# Comparing Olex with Oden EM122 data off Svalbard

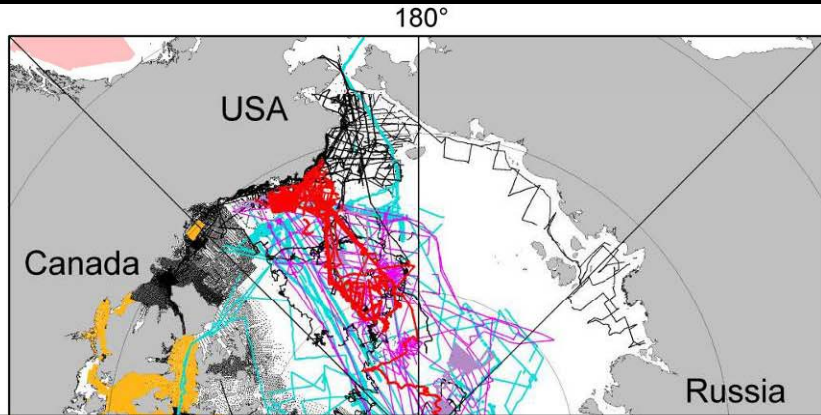

570 m water depth  
(3.5 % difference)

But since the data are of such large difference in resolution, the comparison must be taken with caution

Olex 400 m grid cells versus Oden 20 m grid cells

# IBCAO Version 2.0: Source Data

**6% of the IBCAO area is mapped with multibeam**

- Multibeam Sources**
- USCGC Healy, R/V Nathaniel B Palmer
  - R/V Polarstern
  - I/B Oden
  - Norwegian Petroleum Directorate
  - AMORE (Healy and Polarstern)
  - SCICEX 1999
  - US Naval Research Laboratory (NRL)
  - US Law of the Sea mapping by the Center for Coastal and Ocean Mapping/ Joint Hydrographic Center\*

- Single Beam Sources**
- ~ US and British Royal Navy submarine cruises (1958-1992)
  - ~ SCICEX cruises (1993-1999)
  - Norwegian Hydrographic Service survey
  - ~ Soundings from Canadian Hydrographic Service surveys not included in earlier IBCAOs
  - ~ Soundings collected by various surface vessels and ice drift stations. Five major archives have been included:
    1. US National Geophysical Data Center (NGDC)
    2. US Naval Research Laboratory (NRL)
    3. US Geological Survey (USGS)
    4. Norwegian Hydrographic Service
    5. Royal Danish Administration of Navigation and Hydrography

- Maps and Regional Grids**
- IBCAO drawn contours
  - IBCAO drawn contours based on soundings from charts published by the Russian Federation's Department of Navigation and Oceanography (DNO)
  - 1:5 000 000 scale DNO map of the Arctic Ocean (Naryshkin, 1999)
  - 1:2 500 000 scale DNO map of the Arctic Ocean (Naryshkin, 2001)
  - Charts published by NRL (Perry et al., 1986; Cherkis et al., 1991; Matishov et al., 1995)
  - Contours retrieved from the GEBCO Digital Atlas (GDA) 2003.
  - Bathymetry in the Gulf of Bothnia from a digital grid by Siefert et al. (2001)
  - Greenland DTM by the Danish Cadaster and Mapping Agency (Ekholm, 1996)
  - GTOPO30 topographic model (U.S. Geological Survey, 1997)

**Raw data**

**Processed data**

**Block median filtering**

**Data processing**  
(sound velocity correction, outlier removal etc.)

**Olex**

**Olex**

**Error correction**  
(data flagging)

**Database**

**Olex**

**Data mining**  
(cross track analyzes, contour splicing etc.)

**Visualization and inspection**

**Gridding** (Continuous curvature splines in tension algorithm, GMT algorithm: Smith & Wessel, 1990)

**Thanks for listening!**
