

Online services at Ifremer for marine geosciences data and product access

Sismer French NODC: Vanessa Tosello, Eric Moussat

Int. Tech. : Mickael Treguer

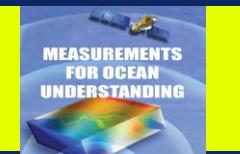

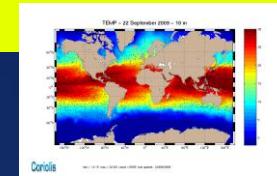

Oceanographic Data Centres program coordinator : G. Maudire

Context

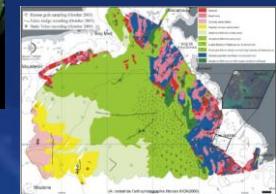

- **Social and economic expectations :**
marine environment quality, climate change impacts, overexploitation of marine ressources, use of the coastal seas
- **Reinforcement of the international and European regulations :**
 - Framework Directive for water protection and management (> EEZ)
 - Marine Strategy Framework Directive for monitoring and preservation of the marine ecosystems
 - INSPIRE Directive for Infrastructure of spatial information in the EC
- **International and european initiatives eg :**
 - the GMES programme (Global Monitoring for Environment and Security) for the implementation a European capacity for Earth Observation (Operational Oceanography)
 - the European Marine Observation and Data Network (EMODNET) programme
 - the European Infrastructures for Marine Research

Strategic axes

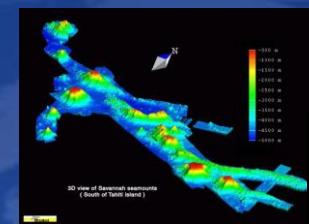

➤ Interactions between ocean circulation and climat changes

➤ Biodiversity and dynamics of open sea and coastal ecosystems

➤ Ecosystemic approach for a sustainable use of the fisheries and of the aquaculture

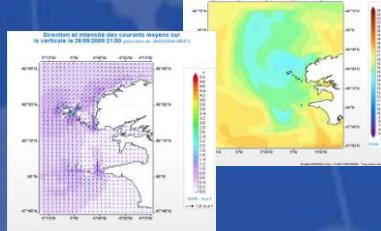

➤ Exploration of the ocean floors for a sustainable use of the mineral resources and energy

➤ Extending the environmental monitoring networks for multidisciplinary analyses and evaluation of natural and anthropogenic hazards

➤ Developping the observing and forecasting systems and services for open and coastal sea operational oceanography

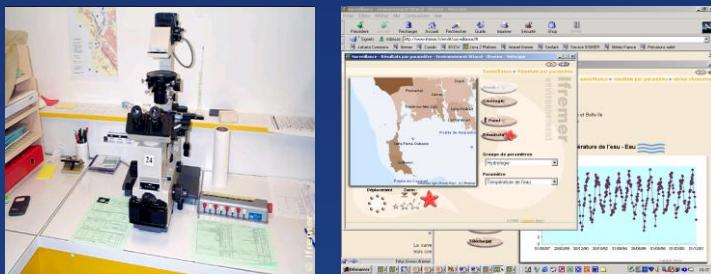

A challenge for the data centres

Marine physics & bio-chemistry + Coriolis DB

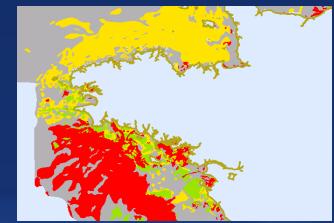

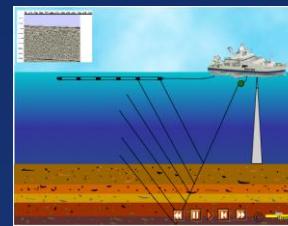

Coastal environment DB

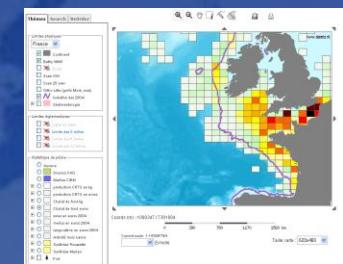

Deep Sea Environment DB

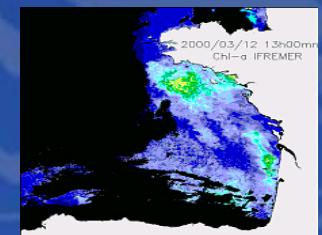

Marine Geology - Geophysics DB

Fisheries DB

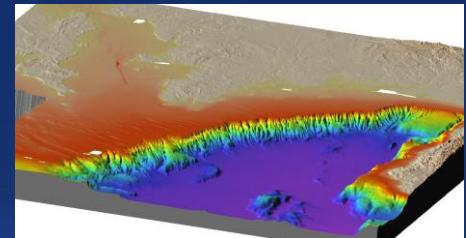

Satellites data CERSAT DB

A challenge for data centres

- Integrated access to all kind of observation data
- Integrated access to aggregated data over large spatial and time coverage
- Standards discovery, viewing, downloading services
- Transparent access to distributed informations systems

2 Ifremer Web portals

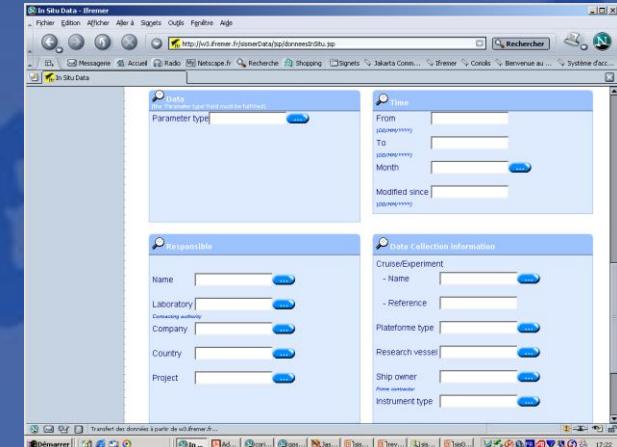

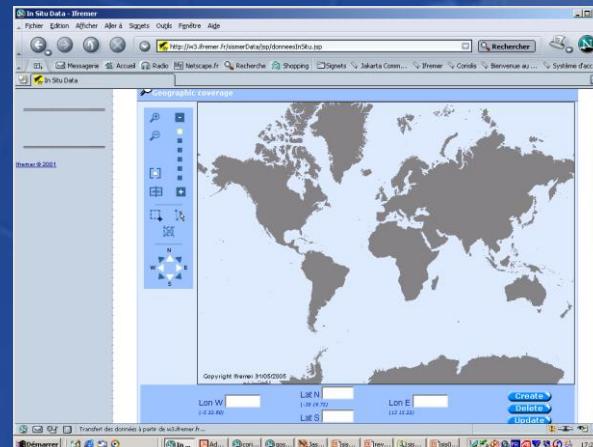

Nautilus for in-situ observation data

www.ifremer.fr/nautilus

Sextant for spatial data products

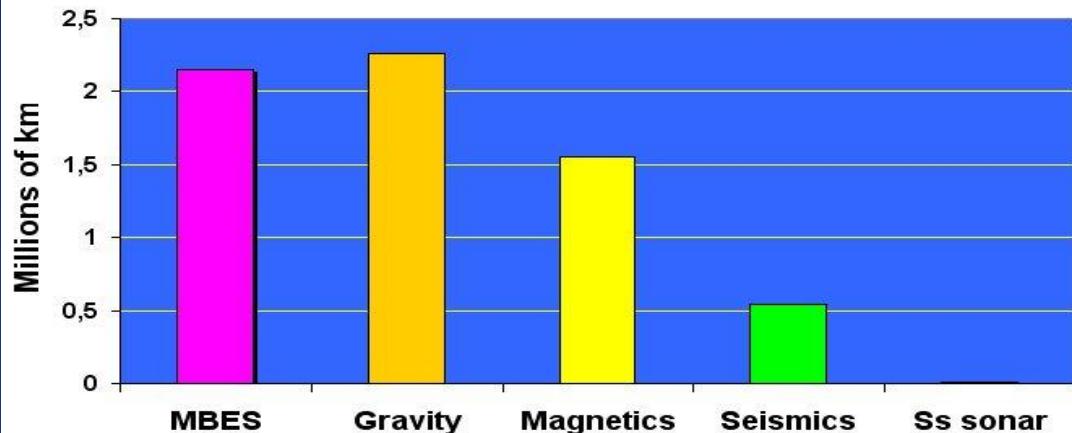

www.ifremer.fr/sextant

Nautilus : a unique entry point to in-situ observation data

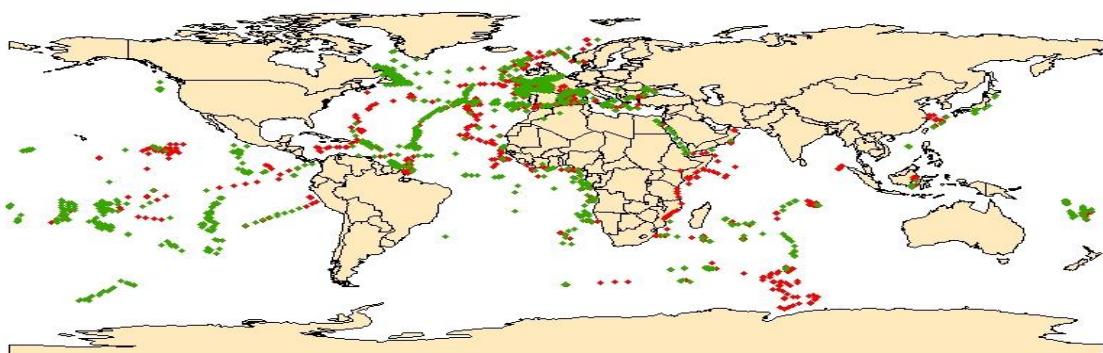

Geophysical and geological data bases

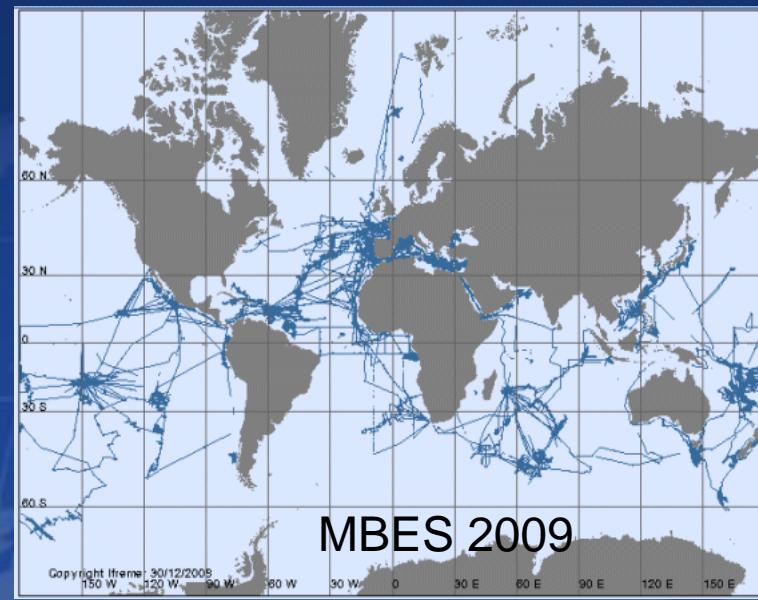

Geophysical data holdings at Ifremer data centre

BGMB - Sampling positions (June 15th, 2009)

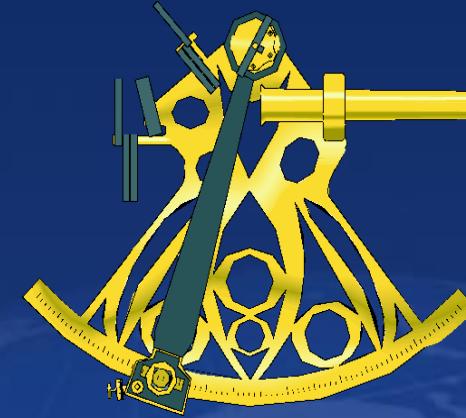

43000 descriptions and analyses of geological samples

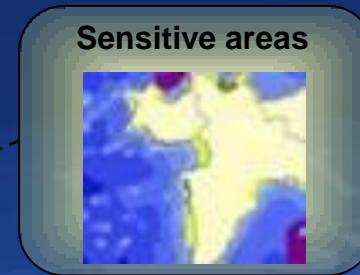

SEXTANT a unique entry point to spatial data

➤ Objectives

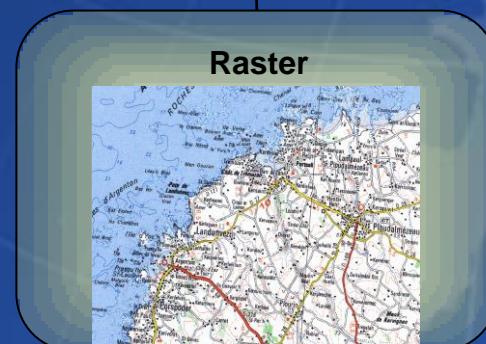

- A Web GIS portal to manage, share and retrieve geographical marine information
- to archive and disseminate reference maps
- to support multidisciplinary studies
 - share of geographical information across disciplines environmental, socio-economical, regulations
- to support decision making
 - management of usages and resources of coastal zone
 - risk assessment

Sextant data (1/2)

Reference map

Sextant data (2/2)

Other GIS data

Geophysics/geology

thematic map

Fisheries

Physical
oceanography

Interoperability (Inspire directive)

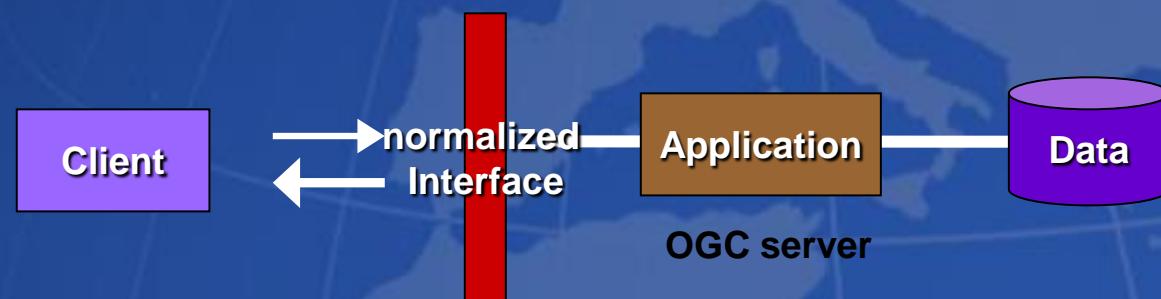

➤ Metadata

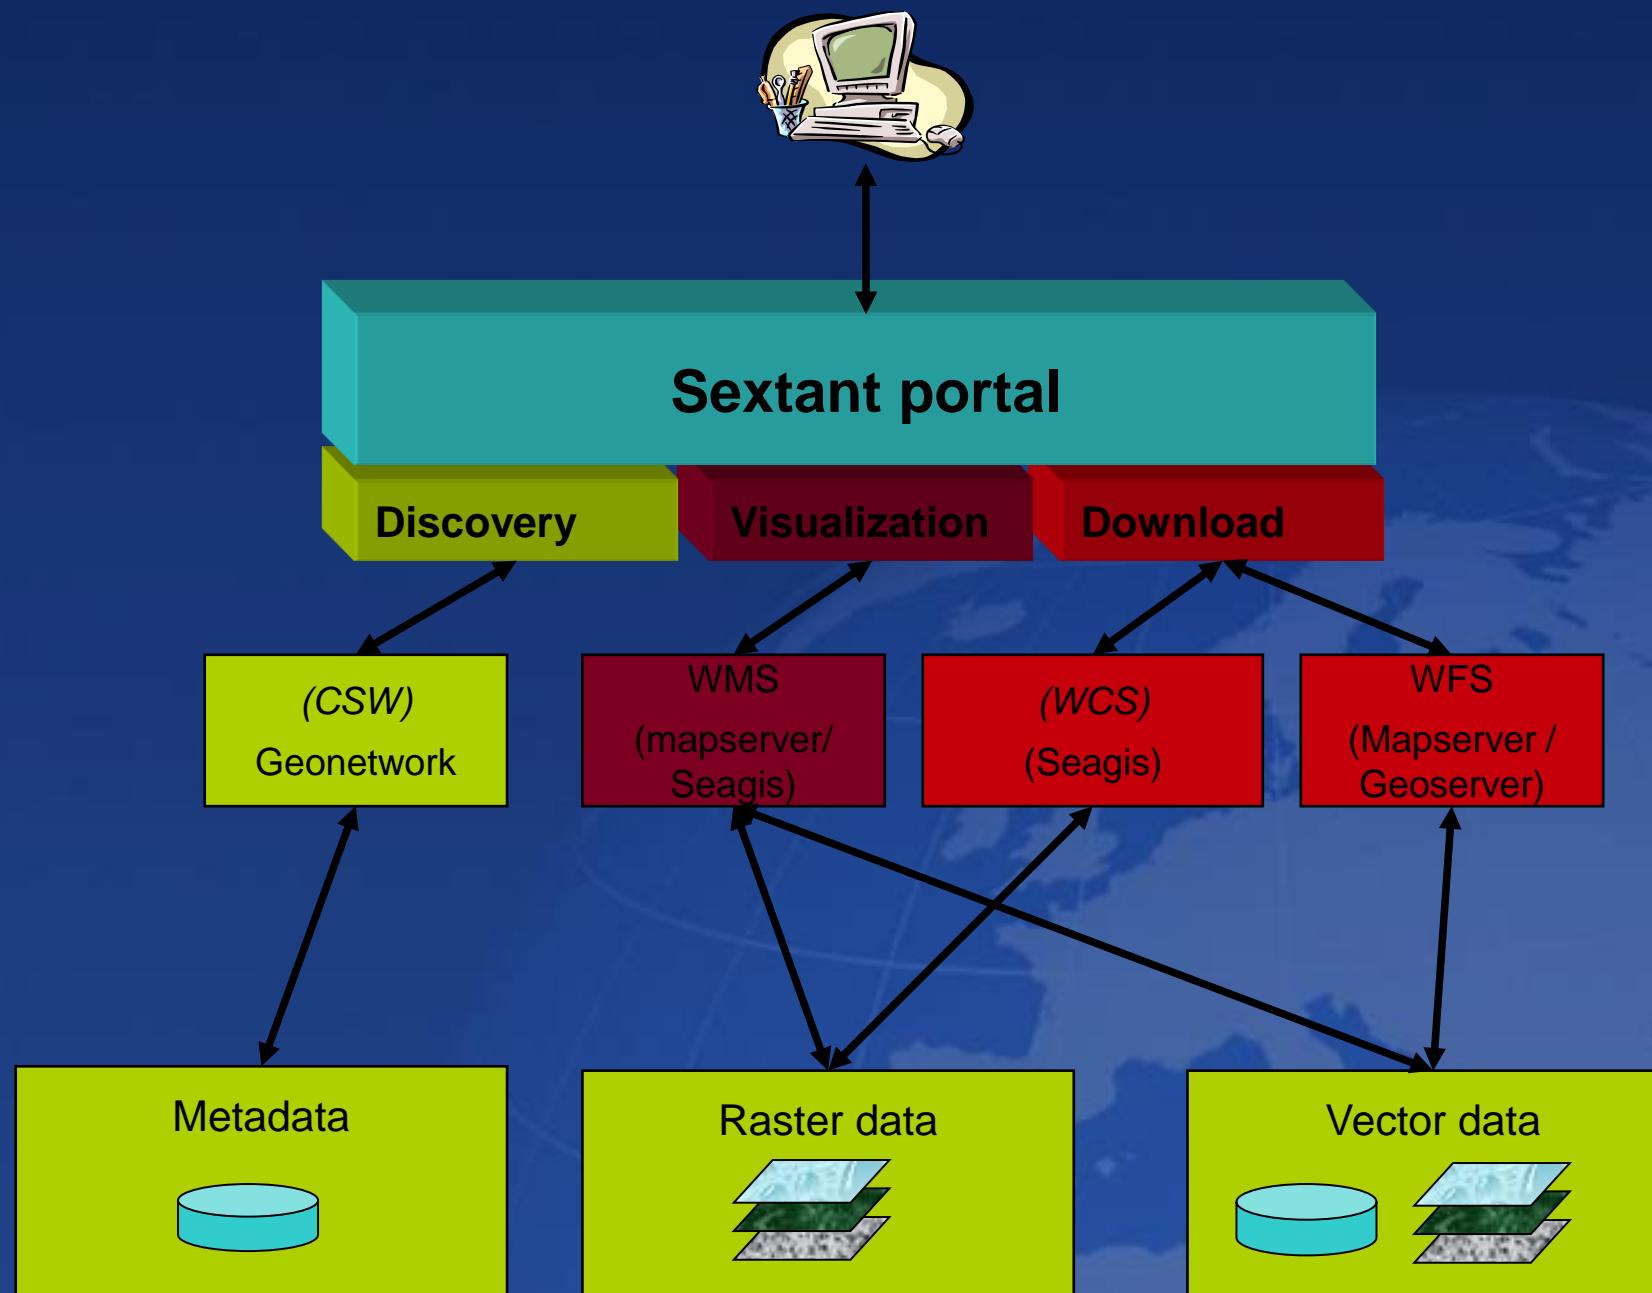

- ISO 19115 – 19139
- *Catalogue Service for the Web (CSW)*

➤ Viewing and access services :

- Web Map Service (WMS)
- Web Feature Service (WFS)
- *Web Coverage Service (WCS)*

Sextant architecture

Discovery / Catalogue

- At the moment more than 500 geographic information available
- Main services:
 - a search facilities / browse metadata (ISO 19115)
 - administration facilities:
 - add / update metadata on-line
 - User right management at different level:
 - metadata
 - visualization
 - download

Catalogue (search interface)

 Carte des sédiments superficiels de la Manche, dite "de Laronneur" Résumé Carte des sédiments superficiels de la Manche, dite "de Laronneur". Mots-clés sédimentologie, Manche, géophysique Couches interactives Editer Supprimer Priviléges Catégories	
 Trait de côte mondial du GEBCO 2003 sous forme d'arcs Résumé Trait de côte mondial à une échelle du 1:250 000. La première édition du Gebco date de 1905. Depuis 5 éditions se sont succédées. En 1983, il est décidé de digitaliser cette édition. Elle regroupe tr... Plus... Mots-clés bathymétrie, topographie, Trait de côte, Monde Ajouter au Panier Couches interactives	
 Bathymétrie mondiale du GEBCO 2003 sous formes d'arcs Résumé Bathymétrie mondiale à une échelle du 1:250 000. La première édition du Gebco date de 1905. Depuis 5 éditions se sont succédées. En 1983, il est décidé de digitaliser cette édition. Elle regroupe tra... Plus... Mots-clés bathymétrie, topographie, Monde Ajouter au Panier Couches interactives	
 Trait de côte métropolitain du Shom au 1:25000 sous forme d'arcs Résumé Cet objet décrit le trait de côte métropolitain du Shom au 1:25000 sous forme d'arcs. C'est le trait de côte de référence à l'Ifremer, en particulier, grâce à sa précision. Il servira de support pour ... Plus... Mots-clés France, Métropole, Trait de côte, isobathe Ajouter au Panier Couches interactives	
 Topographie côtière métropolitaine du Shom à une échelle comprise entre le 1/50 000 et le 1/150 000 sous forme de polygones Résumé Ce lot de données contient : -les isobathes et le zéro des cartes marines provenant de la série

Viewing services

- Allow users to interactively explore layers by presenting information on a zoomable, draggable map (web mapping)
- The portal access to local or remote OGC services : WMS
- Client framework : CartoWeb

Web mapping interface

- 1.layer manager
- 2.tool bar
- 3.map display
- 4.map information

Download

- Shopping basket
- possibility to retrieve data with different extraction parameters:
 - format
 - vectors : shapefile, mapinfo, GML, KML
 - raster : geotiff, JPEG2000
 - projection / datum
 - Lambert, Geographic (WGS84, ED50), Mercator, ...
 - geographical extent

Download (shopping basket)

 Panier d'extraction 

Accueil > Données > Panier >

Données vecteurs :

- [Trait de côte métropolitain du Shom au 1:25000 sous forme d'arcs](#) 
- [Limite des 300 mètres de la ligne de base sur le littoral métropolitain sous forme d'arcs](#) 

Format : Shapefile 

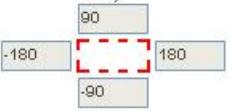

Données rasters :

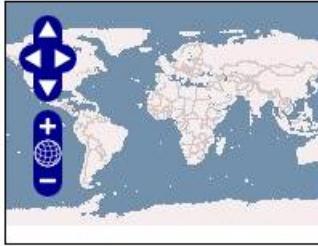

- [Ortho littorale 2000 - Couverture du golfe du Morbihan](#) 
- [Scan25 IGN couvrant le golfe du Morbihan \(56\)](#) 

Format : GeoTiff 

Critères d'extraction

Système de projection : UTM – Datum WGS84 
UTM Zone 30N - Datum WGS84 

Extent : 

 

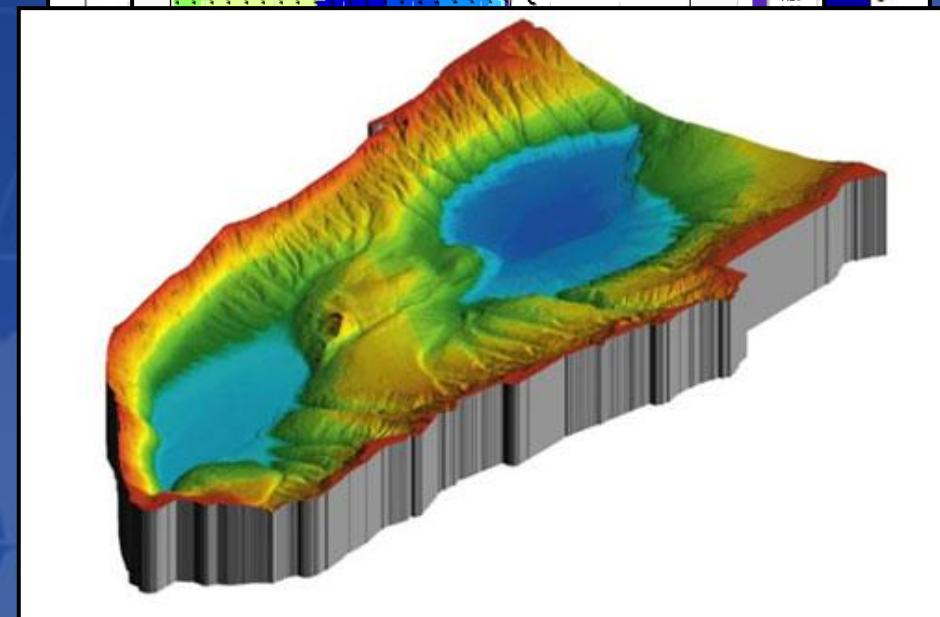

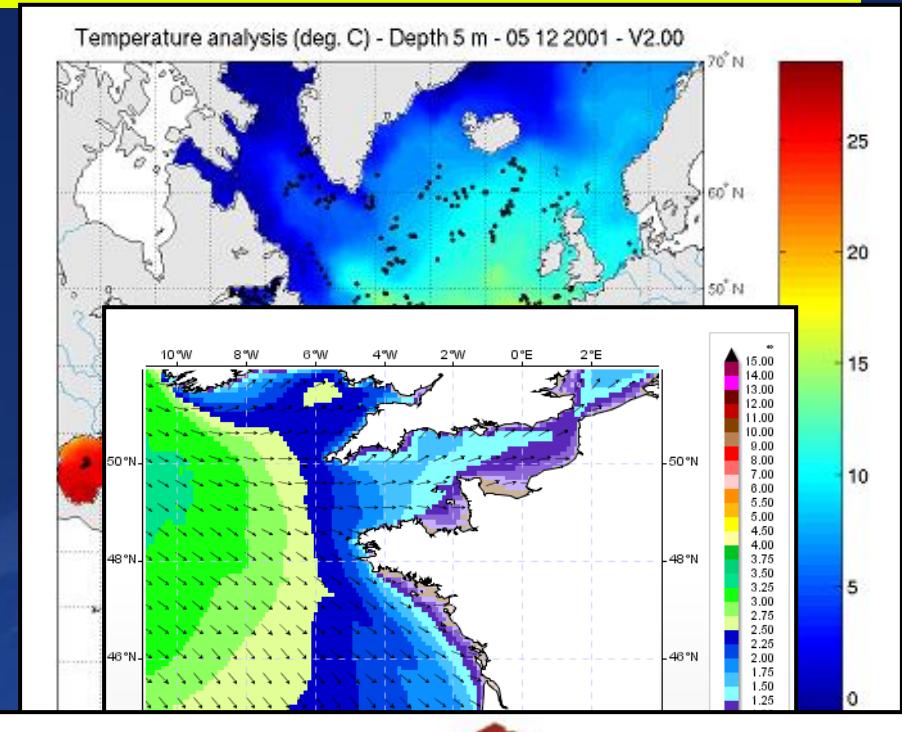

4-D web mapping

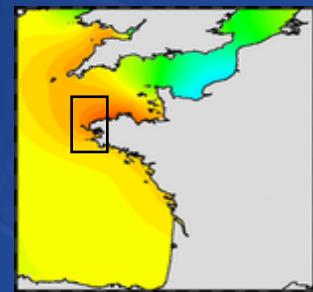

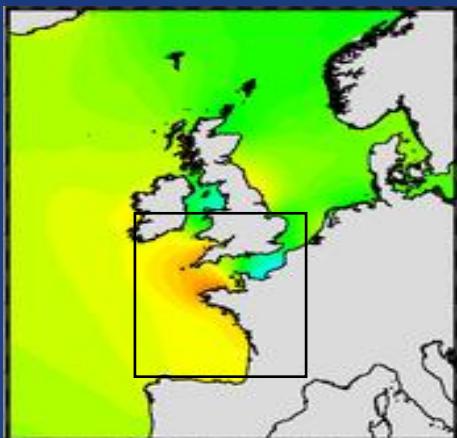

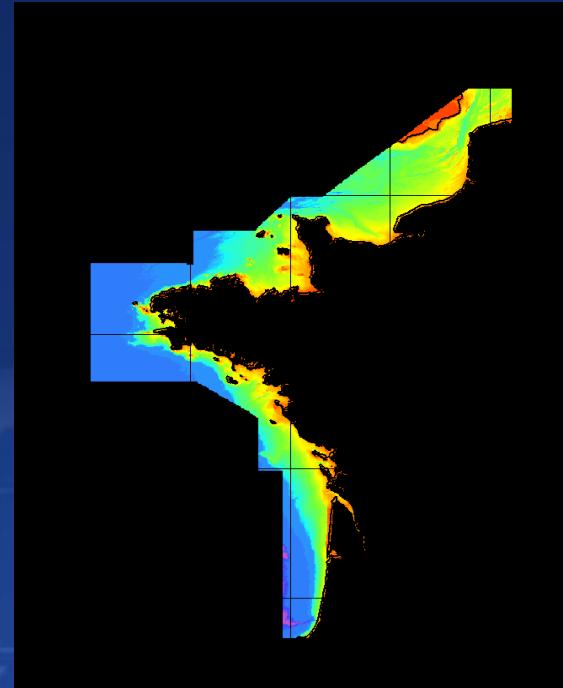

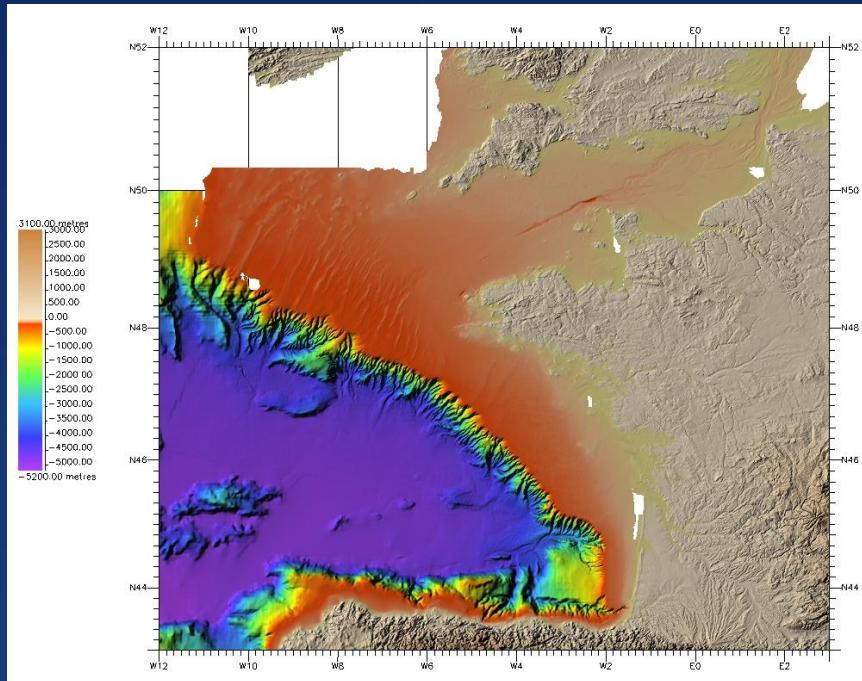

- A number of mapping systems are now available on the web
 - Most mapping software assumes two-dimensional data (x-y)
- Environmental science data is dynamic and **four-dimensional (x-y-z-t)**
- OGC WMS/WCS support 4(plus)-D data (elevation, time)
 - But not many servers or clients support the full specification

Access to multidimensional gridded datasets

- Web Services (WMS, WCS) for:
 - Oceanographic model output
 - Meteorological model output
 - Digital Elevation model
 - ...
- Some particularities:
 - 4D : Latitude, Longitude, Elevation, Time
 - Binary files : NetCDF^{*}, Opendap protocol
 - CF convention

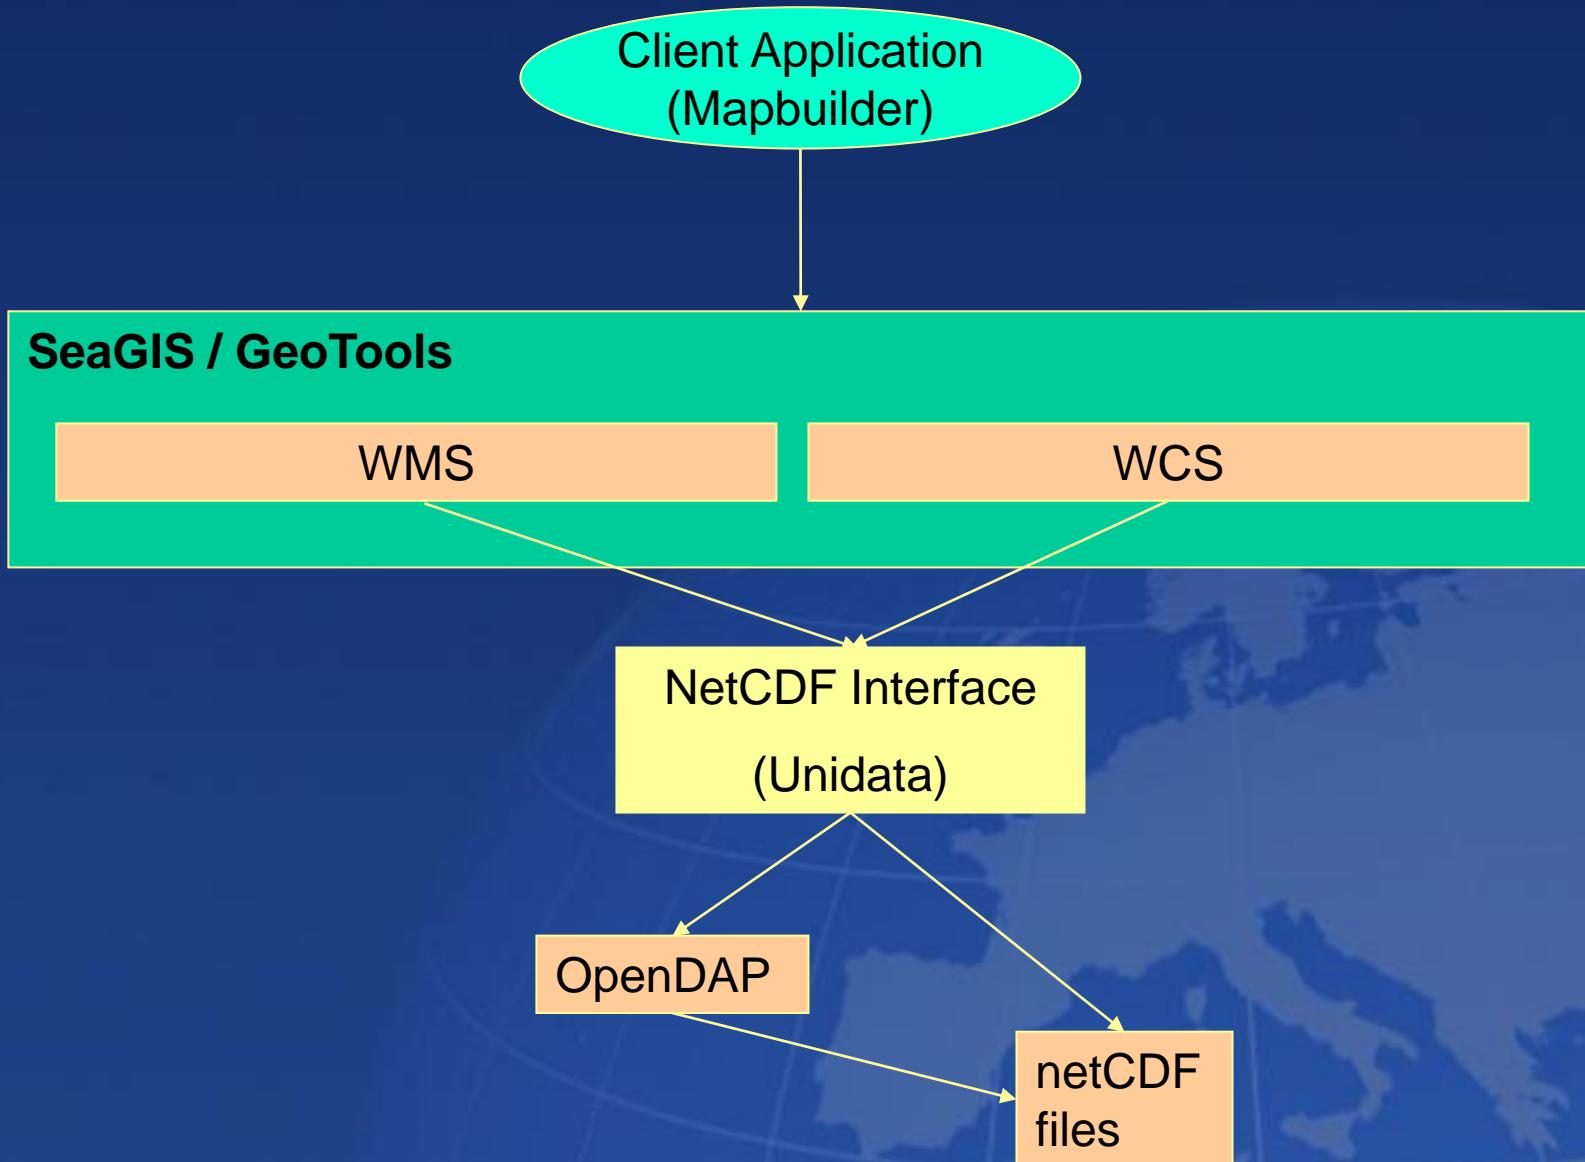

EXAMPLE OF APPLICATION

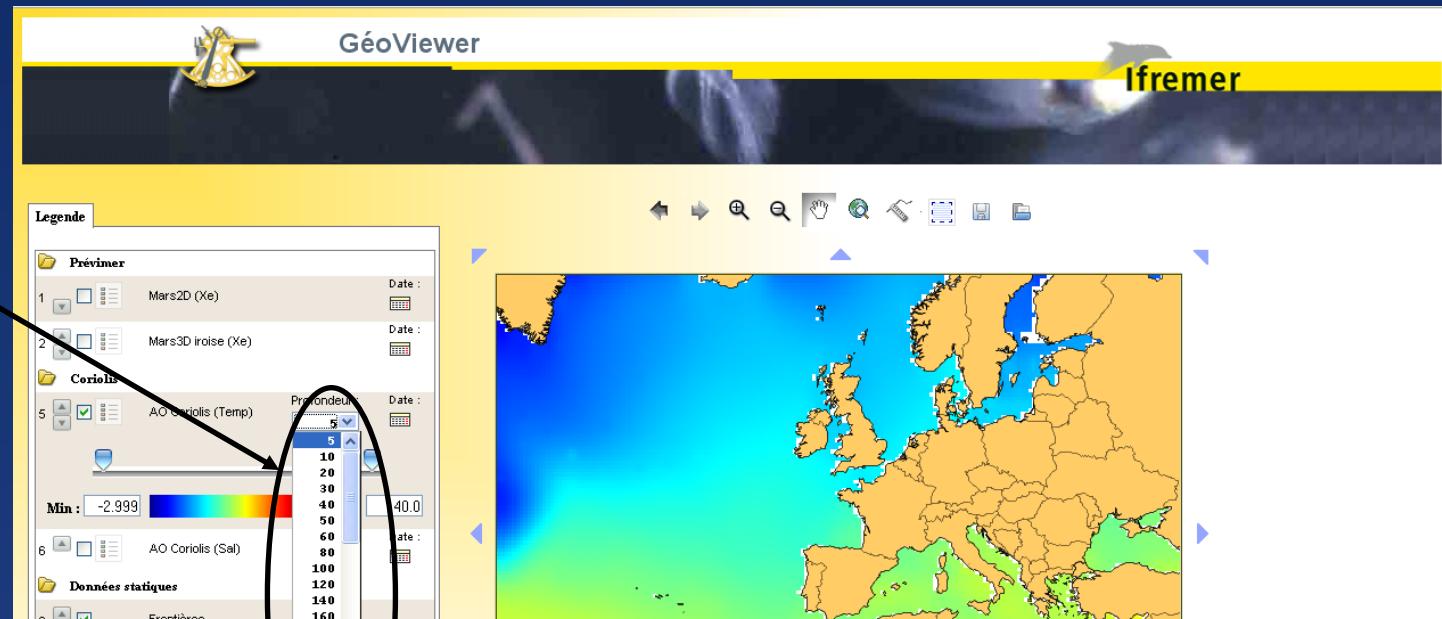

Extraction of subsets of DTM for hydrodynamic modeling

Architecture

Selection of depth

depth levels
available on
the data

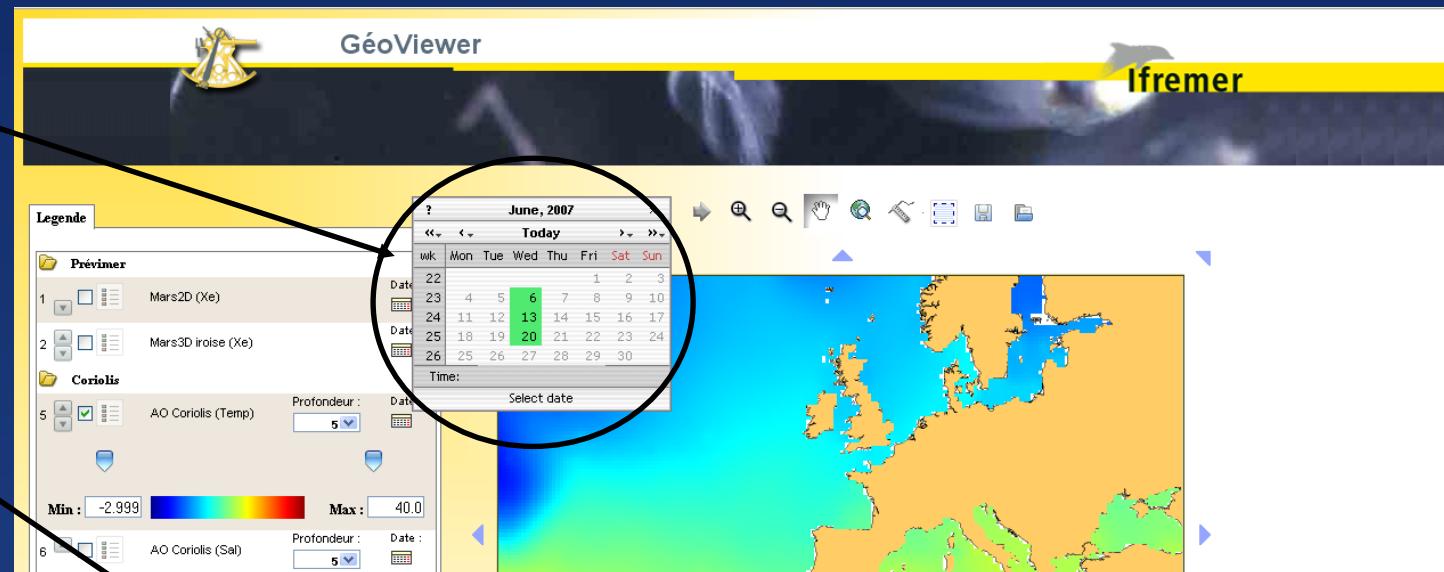

```
<Layer queryable="1">  
  <Name>geom:coriolis</Name>  
  ...  
  <Dimension name="elevation" units="EPSG:5030"/>  
  <Extent name="elevation" default="5">5,10,20, ... ,1850,1900,1950</Extent>  
  ...  
</Layer>
```

Selection of time

time available
on the data

animation

```
<Layer queryable="1">
```

```
  <Name>geom:coriolis</Name>
```

```
  ...
```

```
  <Dimension name="time" units="ISO8601"/>
```

```
  <Extent name="time" default=" 2007-06-20T14:00:00Z ">2007-06-  
  06T14:00:00Z,2007-06-13T14:00:00Z,2007-06-20T14:00:00Z</Extent>
```

```
  ...
```

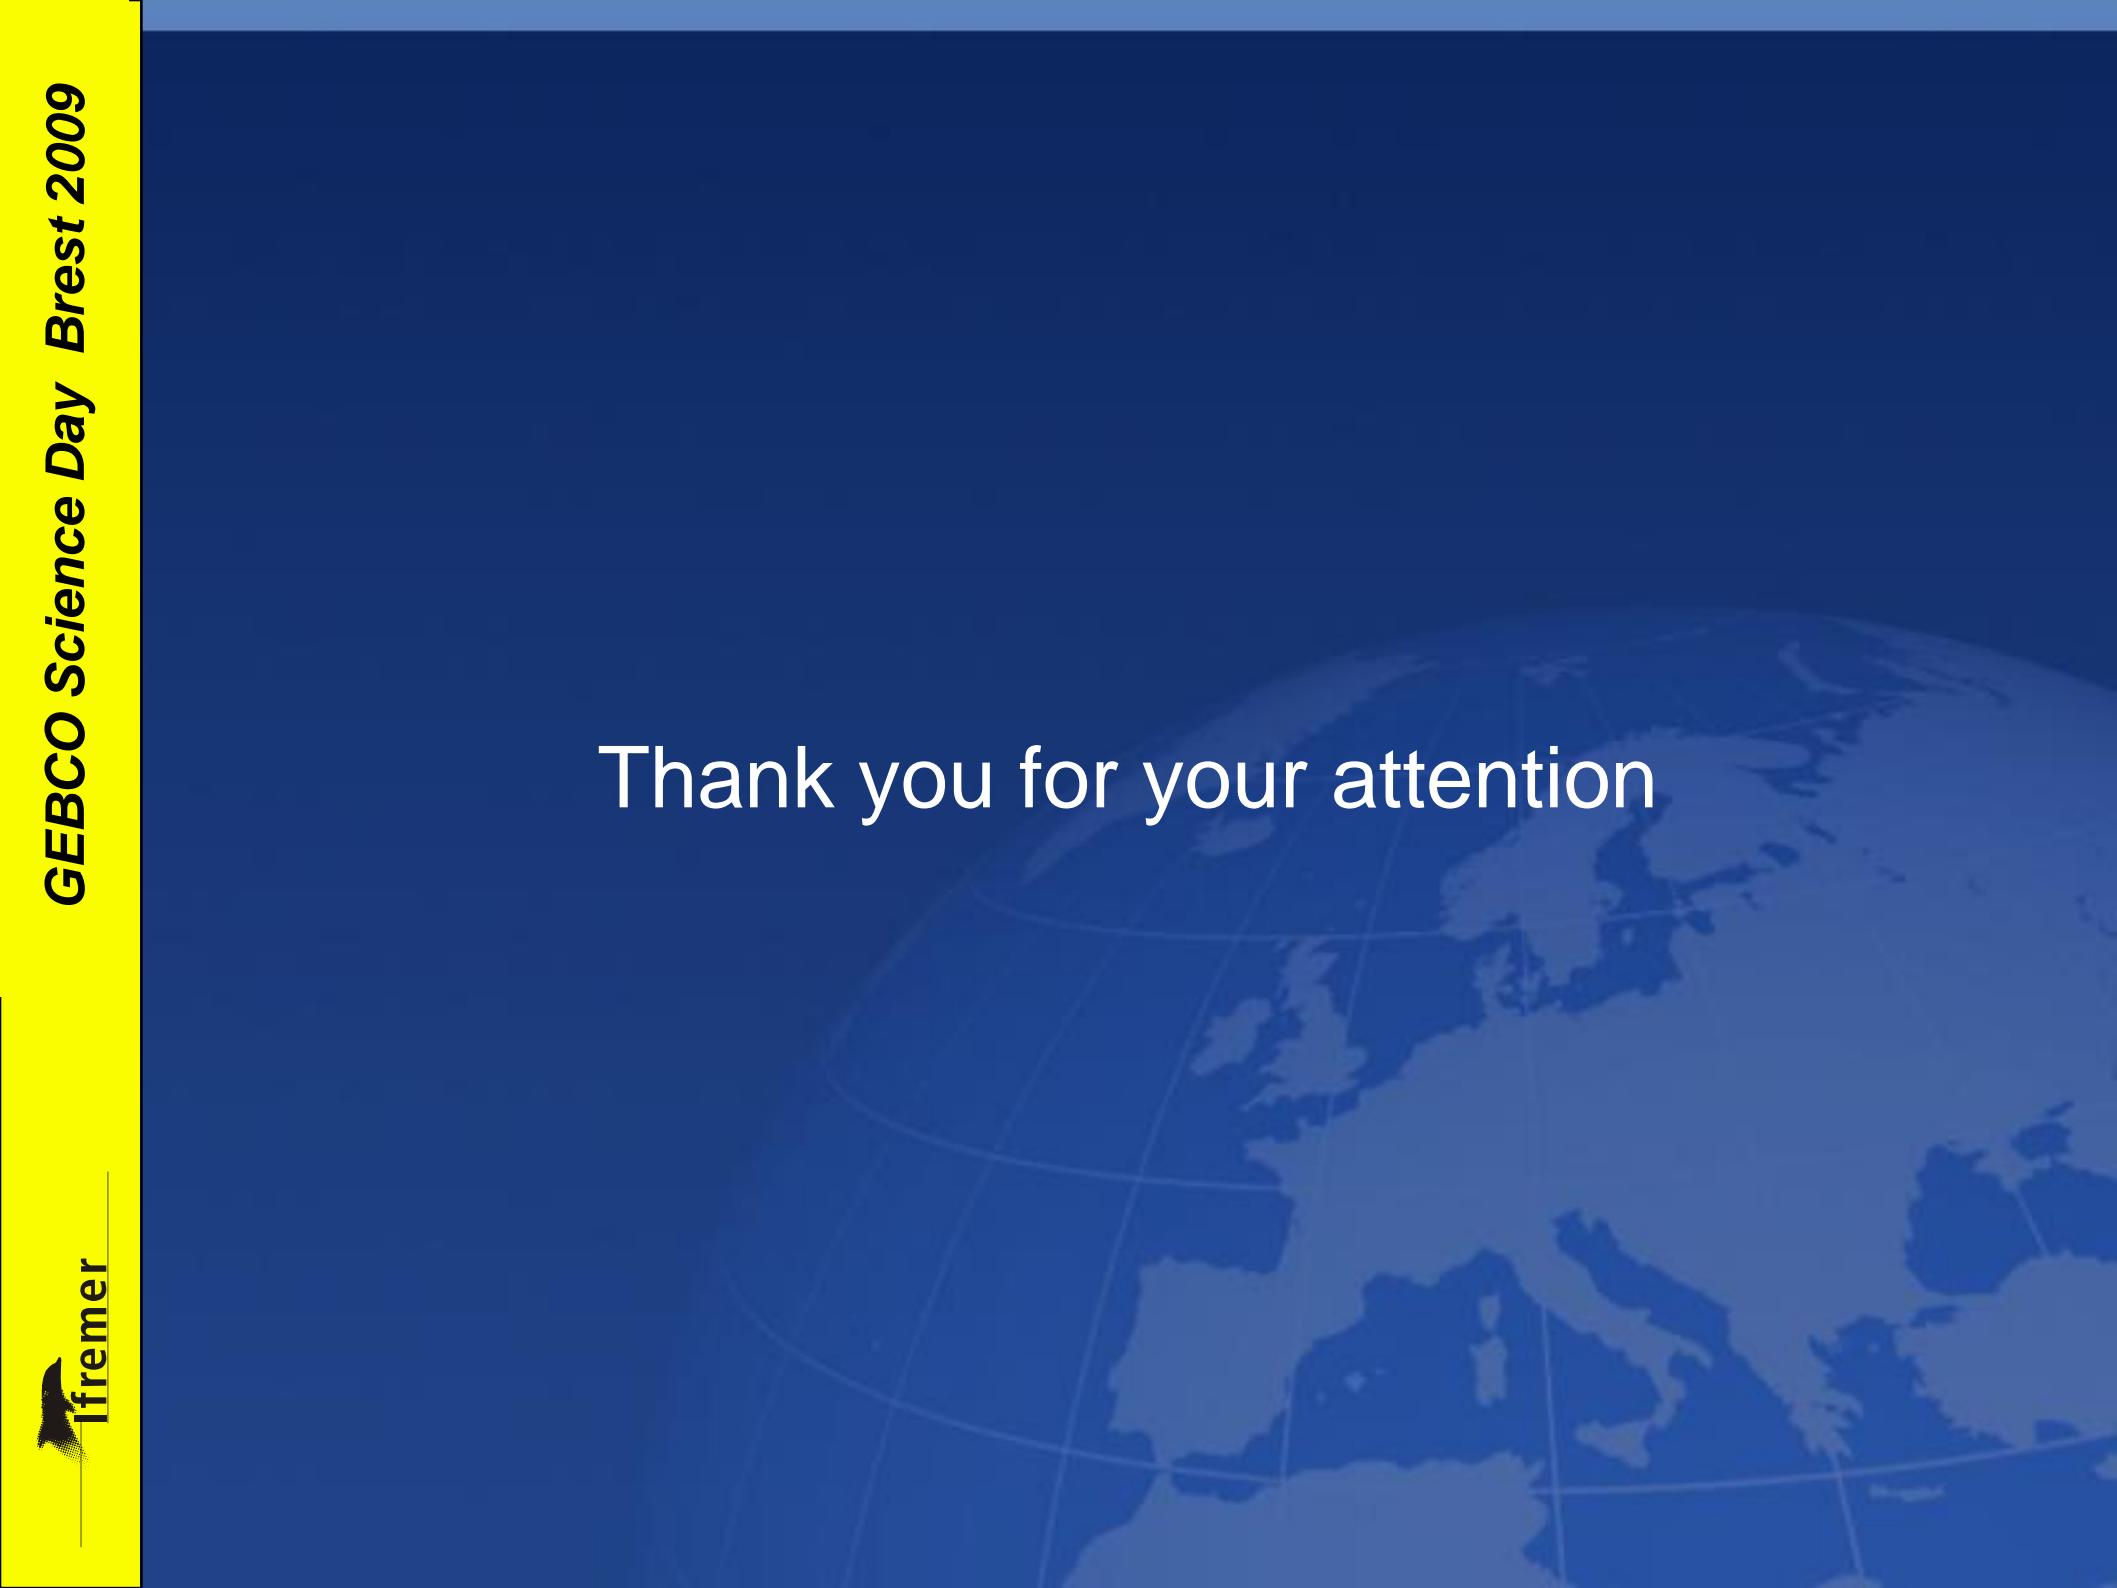

```
</Layer>
```

Future enhancements

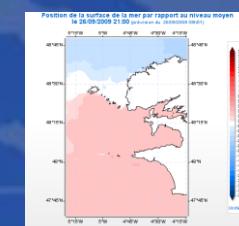

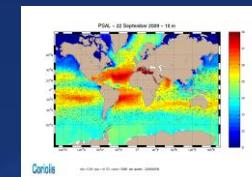

- Provide public access to the Sextant portal
- Use of Catalogue Service for the Web (CSW)
 - to access remote catalogue (metadata)
 - to disseminate our catalogue (metadata)
- Remaining difficulties:
 - multilingualism of metadata
 - security of OGC services

Interactions with European initiatives

- These online services are now being integrated at European level :
 - European Research Infrastructure
 - SEADATANET
 - GEOSEAS (extension of Seadatanet to marine geosciences data)
 - European Marine Observation and Data Network
- Data policy derived from Inspire : still in discussion
 - open access to metadata
 - free of charge access for non profit usage
 - Limitations : Defense, Environment (protection), Economic information
 - Users must agree online on & a moratorium (licence)

Thank you for your attention

- Increasing number of multidisciplinary applications requiring marine observations and spatial data
- Public policies :
 - Directive Inspire :
to set up the spatial data infrastructure within the European Union to sustain the environmental policies of the Union
 - the Maritime Blue Book :
to set an European Marine Observation and Data Network
