GENERAL BATHYMETRIC CHART
OF THE OCEANS
(GEBCO)
an IHO-IOC Joint Project

19th North Indian Ocean Hydrographic Commission (NIOHC) Meeting, Muscat, Oman
26-28 March 2019
What is GEBCO?

The General Bathymetric Chart of the Oceans (GEBCO) (see www.gebco.net)

- Aims to provide the most authoritative, publicly-available bathymetric data sets for the world’s oceans
- Operates under the joint auspices of the
  - International Hydrographic Organization (IHO), and
  - Intergovernmental Oceanographic Commission (IOC) of UNESCO
- First GEBCO paper chart series initiated in 1903
GEBCO Project
organisational structure

- GEBCO is led by a Guiding Committee consisting of five IHO-appointed members; five IOC-appointed members; Sub-committee Chairs and the Director of the IHO-DCDB

- It has 4 sub-committees and a number of working groups:
  - Sub-Committee on Undersea Feature Names (SCUFN)
  - Technical Sub-Committee on Ocean Mapping (TSCOM)
  - Sub-Committee on Regional Undersea Mapping (SCRUM)
  - Sub-Committee on Communications, Outreach and Public Engagement (SCOPE)
  - IHO-IOC GEBCO Cook Book

www.gebco.net/about_us/committees_and_groups/
Our bathymetric data sets and products:

• Global gridded bathymetric data set (30 arc-second interval)
• GEBCO Gazetteer of Undersea Feature Names
• GEBCO Digital Atlas
• Grid viewing software
• Printable maps
• Web Map Service (WMS)
• IHO-IOC GEBCO Cook Book

www.gebco.net/data_and_products/
The GEBCO Source Identifier (SID) Grid:

Shows the source of depth value in each grid cell, *i.e.* if it is based on track-line data; pre-existing grids or if it is based on interpolation.
Filling the data gaps

• Raising awareness of the ‘data gaps’ to encourage data collection in these regions

• Encouraging organizations to make their bathymetric data sets easily discoverable and accessible, either directly or by contributing data to international publically-available databases such as the IHO Data Center for Digital Bathymetry (IHO-DCDB)

• Crowdsourced bathymetry (CSB) initiatives – such as the IHO CSB Working Group

• GEBCO initiative to request shallow water bathymetry data extracted from Electronic Navigation Charts from the Hydrographic Community
Seabed 2030 is a global initiative to cooperatively work towards creating a high resolution complete map of the world’s ocean floor by 2030.

-The Nippon Foundation is a private Japanese-based, non-profit grant-making organization with a mission based around philanthropic activities to pursue global maritime development and assistance for humanitarian work.

-The General Bathymetric Chart of the Oceans (GEBCO) organization operates under the joint auspices of the International Hydrographic Organization (IHO) and the Intergovernmental Oceanographic Commission (IOC) of UNESCO.
Empower the world to make policy decisions, use the ocean sustainably, and undertake scientific research that is informed by a detailed understanding of the global ocean floor.

Only a small portion of the ocean has been mapped with direct measurement.
~50% of the world’s coastal waters remain unsurveyed

As of GEBCO 2019 - only 6% of our global goal is met
The UN Decade of Ocean Science for Sustainable Development (2021-2030)

CONSERVE AND SUSTAINABLY USE THE OCEANS, SEAS AND MARINE RESOURCES FOR SUSTAINABLE DEVELOPMENT

A Vision for the Decade

Develop scientific knowledge, build infrastructure and foster partnerships for a sustainable and healthy ocean
Collaboration and cooperation at local, regional and global scales

Seabed 2030 Regional Data Assembly

GEBCO Global Products

National
Regional
Global
Seabed 2030: Regional Centers

- Coordinate with stakeholders
- Build upon ongoing regional efforts including IBCs
- Develop mechanisms for attribution
- Assemble regional data products
Usage bands 2 & 3 provided after IHO calls 2006 and 2016
Coordinating with IBCs

- Seabed 2030 Atlantic/Indian Oceans RDACC
  - IBC of the Caribbean Sea & Gulf of Mexico (IBCCA)
  - IBC of the Central Eastern Atlantic (IBCEA)
  - IBC of the Mediterranean (IBCM)
  - IBC of the Western Indian Ocean (IBCWIO)
- Seabed 2030 South & West Pacific RDACC
  - IBC of the South Eastern Pacific (IBCSEP)
- Seabed 2030 Arctic/North Pacific RDACC
  - IBC of the Arctic Ocean (IBCAO)
  - IBC of the Caribbean Sea & Gulf of Mexico (IBCCA)
- Seabed 2030 Southern Ocean RDACC
  - IBC of the Southern Ocean (IBCSO)
Seabed 2030 Status & Next Steps

- Data centers established 2018
- Initial regional data products generated and passed to Global Center
  - New GEBCO grid to be released at spring of 2019
  - Establishing connections with regional stakeholders
How to participate

• Contribute information about existing data coverage
• Contribute data
  • Gridded data products
  • Points from ENCs
• Share information about future mapping plans
• Participate in 2019 Regional Mapping Meetings & GEBCO Meetings

atlantic-indian@seabed2030.org
Capacity-building initiative:
The Postgraduate Certificate in Ocean Bathymetry

*Designed to train a new generation of scientists and hydrographers in ocean bathymetry*

is funded by:

The Nippon Foundation of Japan
www.nippon-foundation.or.jp/en/

and taught at:

The Center for Coastal and Ocean Mapping / Joint Hydrographic Center; University of New Hampshire, USA
