

Error reported in the GEBCO_2019 Grid off Aldabra in the Outer Islands of the Seychelles (46° 30'E; 9° 20'S)

An anomalous ridge, with an elevation of up to 200m above sea-level encircling the atoll, has been reported. This may be an artefact created during the grid generation process.

An image of the GEBCO_2019 Grid for this region, colour-coded for depth is shown below.

For further information about the GEBCO_2019 Grid, visit GEBCO's web site: https://www.gebco.net/data_and_products/gridded_bathymetry_data/
