

## Error in the Type Identifier (TID) Grid coding in the Mediterranean Sea area

Within the GEBCO\_2023 TID Grid, areas of the Mediterranean Sea area have wrongly been coded as '41' – indicating that the bathymetric grid in this region is based on interpolation. These TID grid cells should be coded as '17' - combination of direct measurement methods. Further details about the development of the GEBCO\_2023 Grid can be found in the data set's [documentation](#).
